SUMMARY

MSc student in Computer Vision, Robotics and Machine Learning with experience in data science, database-backed web applications, Python automation, and applied ML. Built work across ERP data workflows, AI course authoring, task management systems, bioinformatics analysis, web scraping notifications, and medical image classification. Seeking software engineering roles using Python, SQL, JavaScript, cloud concepts, and data-driven systems.

TECHNICAL SKILLS

Languages: Python, Java, R, C, SQL, JavaScript, HTML, CSS, PHP, VBScript, JSON

Web/Backend: React, Next.js, Flask, SQLAlchemy, REST APIs, AJAX, JSON, Tailwind CSS, TipTap, Vercel

ML/Data: TensorFlow, Keras, scikit-learn, pandas, NumPy, NLTK, Hugging Face, Matplotlib, Seaborn

Automation/Tools: Selenium WebDriver, Requests, BeautifulSoup, Streamlit, MediaPipe, OpenCV, Tableau, Git, SCADA, Microsoft SQL Server

Cloud/OS: AWS, Google Cloud Platform, Linux, Windows.

EXPERIENCE

JALAM Environment Private Limited | Dec 2024 - Jul 2025

Data Scientist Intern | Hyderabad, India | Data Processing, Data Analysis

- Worked on data processing and analysis workflows for environmental data, applying Python/SQL-style data handling to transform raw inputs into usable insights.
- Supported on-site analytics work by cleaning datasets, preparing analysis outputs, and documenting repeatable processing steps.

Polmon Instruments Pvt Ltd. | Sep 2024 - Dec 2024

Intern | Hyderabad, India | JavaScript, Microsoft SQL Server

- Built database and web application functionality for CCL, supporting communication between customer systems and Oracle ERP.
- Automated receiving/exporting ERP data and reduced manual handoff points in customer-system integration flows.

ClassPilot - CourseGPT | May 2025

Freelance Software Developer | Next.js, React, Tailwind CSS, LLaMA-2, Replicate API, TipTap, Vercel

- Developed an AI-powered course authoring platform that generates structured educational lessons and modules using LLaMA-2 through the Replicate API.
- Implemented smart metadata suggestions, rich text editing, lesson organization, and Vercel deployment with API integration.

GoalGuru - Task Manager | Nov 2024

Freelance Software Developer | Flask, SQLAlchemy, AJAX, JSON, REST APIs

- Built a full-stack task management app with CRUD workflows, task completion tracking, sorting/filtering, and department-wise grouping.
- Integrated dynamic search, task history, and REST-style endpoints for task counts and deletion to improve admin visibility.

PROJECTS

Systems Biology Analysis of Genetic Risk Pathways in Depression | Mar 2026 - Present

University of Surrey | Bioinformatics, Computational Biology, Python, STRING, UniProt, GWAS

- Performing systems biology analysis of depression-associated genes using GWAS Catalog and Psychiatric Genomics Consortium data.
- Mapping genes to proteins with UniProt annotations and planning STRING protein-interaction network analysis with centrality metrics and pathway enrichment.

BMS Notification | github.com/UCTuba/BMS-Notification | Oct 2024

Python, Selenium, Requests, Pushover API, Web Scraping

- Built a Python automation tool that monitors BookMyShow theatre and showtime listings and sends mobile alerts when newly available showtimes are detected.
- Implemented dynamic-page scraping with Selenium, API-based push notifications, previous-run comparison logic, and explicit blocked/error states for operational reliability.

Automated COVID-19 Diagnosis from CT Imaging | Dec 2022 - Apr 2023

Python, TensorFlow, Keras, VGG16, ResNet, Xception, EfficientNet, NumPy, pandas

- Trained transfer-learning CNN models on around 750 CT scan images and evaluated accuracy, precision, recall, and F1 score.
- Generated automated report outputs for detected COVID-19 cases, including findings such as location and severity information.

EDUCATION & CERTIFICATIONS

University of Surrey | Sep 2025 - Sep 2026

Master of Science: Computer Vision, Robotics and Machine Learning

Vellore Institute of Technology, Chennai | Apr 2019 - Apr 2024
Bachelor of Technology: Computer Science | Grade: 7
Using Python to Access Web Data | Issued Nov 2024
University of Michigan | Credential ID: IVCOMY3OL2YK | JSON, Python

ACTIVITIES & LANGUAGES

Runner-up, BrainWave Robotics competition by Innovians Technologies; Telugu Literary Club event management.
Languages: English, Telugu, Hindi, Tamil, French.
